 EDUARDO C. ROBERT  
 SUPERVISORY PATENT EXAMINER

RS  
Examiner, Art Unit 3775

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's representative, John Moetteli, met with the Office to discuss the claim language in relation to the prior art references of Salyer, Salyer et al and Temeles. In order to overcome the prior art, it was stated that applicant define the plateau section as well as the adjacent rise portions of the cutting edges sufficiently to avoid an interpretation of the prior art that would still be deemed to disclose such structure. It was also stated that Figure 3B in its current form is unclear as to what is being shown. Applicant stated that an amended drawing would be filed along with a model of the invention to allow for a clearer understanding of the invention. Applicant was reminded that upon amendment, additional search and/or consideration would be conducted to determine patentability of the claims and that minor issues would be attempted to be resolved through correspondence prior to an Office Action.
